

## Test case T002

Test number	T002	Test name	User creation
Description	Create a user		
Prerequisite tests	T001	Test creator	Jakub Novák
Tests requirements from assignment	4, 9	Test creation date	2026-01-04

## Steps

1. Open main page at <http://localhost:5173> in a web browser.
2. Click on *Register*.
3. Try to create a user with **incorrect** name.
  - **Incorrect** means that the name contains anything other than letters (without accents), numbers and underscores (\_) and is 50 characters or longer.
  - **Incorrect** also means a user whose name is already taken, those being admin, Egg Bank and karel.
4. Confirm that upon trying to register a user with an **incorrect** name an error message is shown.
5. Enter a **correct** name and password of your choosing.
  - Note that users with name admin, Egg Bank and karel already exist and therefore cannot be chosen.
6. Note down your login credentials for further use.
7. Confirm that you have been redirected to the dashboard.
8. Click on *Logout*.
9. Confirm that you have been logged out and redirected to the main page.
10. Click on *Login* on the main page.
11. Enter your credentials.
12. Confirm that you have been logged in and shown the same dashboard.
13. Log out again.
14. Log in as user admin with password Hunter12.
15. Confirm that there is a message in the log saying that a user was created with the name that you have specified.
16. Log out again.
17. Click on *Register* on the main page.
18. Try to create a new account with the same name as your successfully created user.
19. Confirm that the an error message is shown.
