

Test case T002

Test number	T002	Test name	User creation
Description	Create a user		
Prerequisite tests	T001	Test creator	Jakub Novák
Tests requirements from assignment	4, 9	Test creation date	2026-01-05

Steps

1. Open main page at <http://localhost:5173> in a web browser.
2. Click on *Register*.
3. Try to create a user with **incorrect** name.
 - **Incorrect** means that the name contains anything other than letters (without accents), numbers and underscores (_) and is 50 characters or longer.
 - **Incorrect** also means a user whose name is already taken, those being `admin`, `EggBank`, `karel` and `jana`.
4. Confirm that upon trying to register a user with an **incorrect** name an error message is shown.
5. Enter a **correct** name and password of your choosing.
 - Note that users with name `admin`, `EggBank`, `karel` and `jana` already exist and therefore cannot be chosen.
6. Note down your login credentials for further use.
7. Confirm that you have been redirected to the dashboard.
8. Click on *Logout*.
9. Confirm that you have been logged out and redirected to the main page.
10. Click on *Login* on the main page.
11. Enter your credentials.
12. Confirm that you have been logged in and shown the same dashboard.
13. Log out again.
14. Log in as user `admin` with password `Hunter12`.
15. Confirm that there is a message in the log saying that a user was created with the name that you have specified.
16. Log out again.
17. Click on *Register* on the main page.
18. Try to create a new account with the same name as your successfully created user.
19. Confirm that the an error message is shown.
